The Office Action is in response to the Amendment filed on December 18, 2007.

Applicant's cooperation in amending the claims to overcome the claim objections relating

to informalities as well as indefinite claim language is also appreciated.

Claims 1-8 were cancelled; and Claim 9 was newly added.

Specification

The disclosure is objected to because of the following informalities:

- On Page 4, line 12, "compression ration" should be replaced by -

compression ratio – (for correcting typo error).

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite

for failing to particularly point out and distinctly claim the subject matter which applicant

regards as the invention. Specifically,

Lines 2-3, "the recitation of "can be shortened" renders the claim indefinite, since

it is not clear that under which conditions the total length of piston and liner can be

shortened, and under which conditions the total length of piston and liner cannot be

Application/Control Number: 10/564,349

Art Unit: 3748

shortened. Applicants are required to identify these conditions or to revise the claimed limitation.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fukumoto et al. (Pub. Number JP 2002-309949 A), in view of Hatch (patent Number 1,603,107) or Murakami (Pub. Number JP 10-296183 A).

Fukumoto discloses an engine having an air tank (1) which stores 2-4 times compressed and heated air or mixed fuel gas with a constant temperature and pressure temporarily under given conditions in order to make the air or the gas inhale into cylinder liner (17) so that the total length of piston (16) and liner (17) can be shortened (See Figures 1 and 5, Paragraphs [0002], [0003], [0014], and claim 6 of an attached translation copy),

wherein the air tank (1) has a valve (43) for controlling a constant temperature of the compressed and heated air or mixed gas and provision into the tank for storing temporarily (See Paragraphs [0027]-[0028]).

However, Fukumoto fails to disclose a temperature regulator.

Art Unit: 3748

Hatch/Murakami teaches that it is conventional in the art of air heating control system to utilize the air tank having a temperature regulator (2 of Hatch; and 4 of Murakami) (See Figure 1 and Page 1, lines 89-97 of Hatch; and Figure 1 and Abstract).

It would has been obvious to one having ordinary skill in the art at that time the invention was made, to have utilized a temperature regulator, as taught by Hatch/Murakami, to improve the control of the temperature for the Fukumoto device.

Response to Arguments

Applicant's arguments with respect to claim 9 have been considered but are moot in view of the new ground(s) of rejection.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3748

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thai-Ba Trieu whose telephone number is (571) 272-4867. The examiner can normally be reached on Monday - Thursday (6:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion can be reached on (571) 272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
